User Roles

Feature	Description	Roles / Endpoint
Live Operations Dashboard	Real-time overview cards: active boarders, today's arrivals/departures, open tasks, revenue. Refreshes on load.	All staff GET /dashboard
Branch-scoped Filtering	Branch managers and below see only their branch data. Super-admins see all branches aggregated.	All staff GET /dashboard
Occupancy KPI Card	Shows current live kennel occupancy count with capacity. Colour-coded by fill percentage.	All staff GET /dashboard
Revenue at a Glance	Today's payments received and monthly total displayed on the dashboard header.	Super Admin, Branch Manager GET /dashboard
Quick-Access Navigation	Sidebar with role-filtered navigation links to all modules. Collapses on mobile.	All staff —
Feature	Description	Roles / Endpoint
Client List with Search	Paginated client list with name/phone/email search, status filter, and branch filter.	Reception, Branch Manager, Super Admin GET /clients
Client Profile	Full client record: personal details, linked pets, booking history, invoice history, wallet balance, onboarding status.	Reception, Branch Manager, Super Admin GET /clients/:id
Client Create / Edit	Form to create or edit client with name, phone, email, home branch, source, notes.	Reception, Branch Manager, Super Admin POST /clients, PUT /clients/:id
Pet Sub-listing on Client	View all pets linked to a client from the client profile, with direct links to pet profiles.	All staff GET /clients/:id/pets
Booking History on Client	Full booking history for a client filterable by status and date range.	Reception, Branch Manager, Super Admin GET /clients/:id/bookings
WhatsApp Quick-Message	One-click WhatsApp deep-link from client profile opens a pre-populated message in WhatsApp.	Reception, Branch Manager, Super Admin —
Client Archiving & Restoration	Super admins can archive/restore clients. Archived clients are excluded from all operational views.	Super Admin POST /admin/clients/:id/archive, /restore
Portal Preview (Staff)	Staff can preview the client's My Pets portal access link from the client profile.	Reception, Branch Manager, Super Admin GET /clients/:id/portal-preview

Feature	Description	Roles / Endpoint
Pet Profile	Full pet record: name, type, breed, size, DOB, vaccination status, microchip, medical history, preferences/allergies, special care flags, medication details.	All staff GET /pets/:id
Pet Create / Edit	Form to create or update a pet linked to a client. Includes vaccination status and medical fields.	Reception, Branch Manager, Super Admin POST /clients/:id/pets, PUT /pets/:id
Vaccination Status Tracking	Pets flagged with vaccination status (vaccinated / partial / unvaccinated). SAL briefs highlight unvaccinated pets currently boarded.	All staff PUT /pets/:id
Medical History & Allergies	Long-form fields for major illness history, ongoing medication, dietary restrictions, and grooming preferences.	All staff GET/PUT /pets/:id
Document Uploads	Upload and manage documents per pet (vaccination records, health certificates, vet reports). File storage on server.	Reception, Branch Manager, Super Admin GET/POST/DELETE /pets/:id/documents
Medication / Special Care Flag	Pets on active medication or special care are flagged in the SAL brief and highlighted during boarding.	All staff GET /pets/:id
Pet Archiving & Restoration	Archived pets are removed from booking selection and operational views. Restorable by super admin.	Super Admin POST /admin/pets/:id/archive, /restore

Feature	Description	Roles / Endpoint
Booking Creation (Multi-pet)	Create a booking for one or more pets with individual stay dates, boarding service type, and add-on services.	Reception, Branch Manager, Super Admin POST /bookings
Booking List with Filters	Filterable booking list by status, branch, date range, and client. Sortable by date and status.	All staff GET /bookings
Booking Detail View	Full booking record: client, pets, stays, add-ons, pricing breakdown, invoice link, status history.	All staff GET /bookings/:id
Boarding Service Selection	Select from configured boarding services (e.g. Standard Suite, Premium Suite) with pricing auto-calculated by the pricing engine.	Reception, Branch Manager, Super Admin GET /settings/boarding
Add-on Services	Attach add-on services (grooming, medication, special meals) to any stay. Add or remove add-ons post-booking.	Reception, Branch Manager, Super Admin POST/DELETE /bookings/:id/addons
Automatic Invoice Generation	Invoice is auto-generated on booking creation with line items for boarding + add-ons. Recalculates on stay changes.	Reception, Branch Manager, Super Admin POST /bookings
Check-In Workflow	Guided check-in screen. Assigns kennel, records actual check-in date/time, updates booking status to active.	Reception, Branch Manager, Super Admin POST /bookings/:id/checkin
Check-Out Workflow	Guided check-out screen. Records actual departure, updates billing if stay extended, closes booking.	Reception, Branch Manager, Super Admin POST /bookings/:id/checkout
Booking Cancellation & Restoration	Cancel bookings with reason. Super admin can restore cancelled bookings from data management.	Branch Manager, Super Admin POST /admin/bookings/:id/cancel, /restore
Overstay Detection	SAL automatically flags pets whose check-out date has passed but who are still actively boarded.	All (via SAL brief) SAL pipeline

Feature	Description	Roles / Endpoint
Visual Kennel Occupancy Board	Card-based view of all kennels per branch showing current occupant, pet name, stay dates, and status. Colour-coded by state (vacant/occupied/cleaning).	All staff GET /kennel-board
Linear Timeline View	Horizontal timeline showing kennel occupancy across a date range. Identify gaps and plan capacity.	All staff GET /kennel-board
Kennel Assignment at Check-In	Staff select or confirm kennel assignment during the check-in workflow.	Reception, Branch Manager, Super Admin POST /stays/:id/assign-kennel
Kennel Configuration	Define kennels per branch: code, name, capacity notes, active/inactive status.	Super Admin GET/POST /kennels, /kennels/:id
Kennel Staff Assignment	Assign staff members to specific kennels for responsibility tracking.	Super Admin, Branch Manager —

Feature	Description	Roles / Endpoint
Invoice List	List all invoices with status filters (pending, partial, paid, overdue). Search by client or invoice ID.	Reception, Branch Manager, Super Admin GET /invoices
Invoice Detail View	Full invoice with itemised line items, subtotals, payment records, and adjustment history.	Reception, Branch Manager, Super Admin GET /invoices/:id
PDF Document Generation	Generate a professional PDF invoice using mPDF. Includes facility branding, line items, payment terms, and QR code.	Reception, Branch Manager, Super Admin POST /invoices/:id/document/generate
PDF Email Delivery	Send the invoice PDF as an email attachment to the client's registered email address.	Reception, Branch Manager, Super Admin POST /invoices/:id/send-email
WhatsApp Payment Link	Generate a WhatsApp deep-link with the invoice summary and payment instructions. Opens a pre-filled WhatsApp message.	Reception, Branch Manager, Super Admin GET /invoices/:id/whatsapp-link
Public Invoice Summary Page	Token-gated public URL (no WP login required) where clients can view their invoice summary and download the PDF.	Public (client, via token) GET /public/invoice/:token
Invoice Adjustment	Apply manual adjustments (discounts, corrections) to an invoice with a reason. Logged in audit trail.	Branch Manager, Super Admin POST /invoices/:id/adjust
Invoice Audit Trail	Every invoice action (generated, adjusted, emailed, payment recorded, PDF viewed) is logged with timestamp, actor, and change details.	Super Admin, Branch Manager GET /invoices/:id/audit
Payment Recording	Record full or partial payments against an invoice. Supports multiple payment modes (cash, card, bank transfer, UPI, wallet).	Reception, Branch Manager, Super Admin POST /payments, GET /invoices/:id/payments
Overdue Invoice Tracking	Invoices unpaid beyond 7 days flagged as overdue. Highlighted in the SAL Accounts Snapshot and reports.	All (via SAL) SAL pipeline

Feature	Description	Roles / Endpoint
Task List with Filters	View tasks by branch, status, priority, and due date. Supports overdue filter.	All staff GET /tasks
Task Creation	Create tasks with title, description, branch, assignee, priority (low/medium/high/urgent), and due date.	Reception, Branch Manager, Super Admin POST /tasks
Task Status Workflow	Move tasks through open !' in progress !' done. Status changes logged with timestamp.	All staff PUT /tasks/:id
Assignee Management	Assign tasks to specific staff members. Unassigned tasks are flagged in SAL briefs.	Branch Manager, Super Admin PUT /tasks/:id
Overdue Task Alerts (SAL)	SAL morning and evening briefs list all overdue tasks by branch with title and due date.	All (via SAL) SAL pipeline
Priority Management	Four priority levels: low, medium, high, urgent. High/urgent tasks highlighted in the task list.	All staff GET/PUT /tasks
EXPENSE TRACKING		
Feature	Description	Roles / Endpoint
Expense Recording	Record branch expenses with description, amount, category, date, and optional notes.	Reception, Branch Manager, Super Admin POST /expenses
Expense List with Filters	Filter expenses by branch, category, date range. Displays running totals.	Branch Manager, Super Admin GET /expenses
Expense Category Management	Create and manage expense categories (e.g. Feed, Veterinary, Utilities, Maintenance).	Super Admin GET/POST/PUT /expense-categories
Expense Reporting in SAL	Daily expenses are included in the SAL Accounts Snapshot: count and total per branch.	All (via SAL) SAL pipeline
OPSMAIL Expense Inbox	Staff can email expenses to a configured IMAP inbox. Gemini AI classifies and creates the expense record automatically.	All staff (via email) POST /opsmail/process-mailbox

Feature	Description	Roles / Endpoint
Public Inquiry Form	Public-facing inquiry form (no login required) on the WordPress frontend. Captures owner name, phone, email, pet details, preferred dates.	Public POST /public/inquiries
Inquiry List & Management	Internal inquiry list with status workflow: new !' reviewing !' onboarding !' converted / rejected.	Reception, Branch Manager, Super Admin GET /inquiries
Inquiry Detail & Notes	View full inquiry details, add internal notes, track status history.	Reception, Branch Manager, Super Admin GET/POST /inquiries/:id/notes
Duplicate Detection	System checks for existing clients/inquiries with matching phone/email before processing a new inquiry.	Reception, Branch Manager, Super Admin GET /inquiries/:id/duplicate-check
Onboarding Link Generation	Generate a unique 64-char token URL for the client to complete their own onboarding form online.	Reception, Branch Manager, Super Admin POST /inquiries/:id/send-onboarding
Multi-step Online Onboarding Form	Client-facing form: personal details, pet profiles, document uploads, T&C acceptance. No WP account needed.	Public (client, via token) GET/POST /public/onboarding/token
Automatic Acknowledgement Email	Automated email sent to the inquiry owner immediately on form submission.	System POST /public/inquiries
WhatsApp Onboarding Message	Staff can send a configurable WhatsApp message with the onboarding link directly from the inquiry detail screen.	Reception, Branch Manager, Super Admin —
Inquiry-to-Client Conversion	One-click convert a completed inquiry to a full client + pet record. Linked to home branch.	Reception, Branch Manager, Super Admin POST /inquiries/:id/convert

Feature	Description	Roles / Endpoint
Revenue Report	Revenue by branch, month, and service type. Includes total billed, paid, and outstanding amounts.	Super Admin, Branch Manager GET /reports
Occupancy Analytics	Occupancy rate over time per branch. Average stay length and peak occupancy periods.	Super Admin, Branch Manager GET /reports
Boarding Trends	Trend charts for bookings by pet type, breed size, and boarding service category.	Super Admin, Branch Manager GET /reports
Expense Analysis	Expense totals by category and branch. Compare income vs expenses.	Super Admin, Branch Manager GET /reports
Payment Mode Breakdown	Breakdown of payments received by mode: cash, card, UPI, bank transfer, wallet.	Super Admin, Branch Manager GET /reports
Date Range Filtering	All report views support custom date range selection. Defaults to current month.	Super Admin, Branch Manager GET /reports?from=&to=

Feature	Description	Roles / Endpoint
Event-Driven Notification Queue	Internal queue (opb_opsmail_queue) captures all operational events. 5 hook points: booking creation, check-in, check-out, payment recorded, invoice sent.	System GET /opsmail/queue
Telegram Notification Delivery	WP Cron flushes the queue every minute, delivering pending messages to the configured Telegram bot.	System (delivery) / Super Admin (view) POST /opsmail/process-telegram
IMAP Email Inbox Polling	Polls a configured IMAP mailbox every 5 minutes for unstructured operational emails (e.g. expense submissions).	System POST /opsmail/process-mailbox
Gemini AI Email Classification	Incoming emails are classified by Google Gemini. Recognised expense emails are auto-created as expense records.	System POST /opsmail/gemini-run
Queue Viewer with Acknowledge	Staff can view the full event queue, see message status, and acknowledge processed items.	Super Admin GET /opsmail/queue, POST /opsmail/queue/:id/acknowledge
Gemini Lab (Test Interface)	Admin UI to test Gemini prompts and OPSMAIL pipeline without triggering real events.	Super Admin POST /opsmail/test-gemini
Cron Health Monitor	Displays status of all OPB cron jobs: last run, last success, next scheduled.	Super Admin GET /opsmail/cron-health
Test Telegram & Mailbox	One-click test endpoints to verify Telegram bot connectivity and IMAP mailbox access.	Super Admin POST /opsmail/test-telegram, /opsmail/test-mailbox

Feature	Description	Roles / Endpoint
Morning Operations Brief	Automated 07:00 Telegram brief: active boarders, today's arrivals/departures, overdue tasks, medication pets, exceptions.	System (delivery) / Super Admin (config) POST /sal/send
Evening Closure Brief	Automated 19:00 Telegram brief: actual check-ins/check-outs completed, open tasks, day summary.	System (delivery) / Super Admin (config) POST /sal/send
Accounts Snapshot	Automated financial brief: payments received today, unpaid/overdue invoices, expenses by branch. Numbers only, no interpretation.	System (delivery) / Super Admin (config) POST /sal/send
Gemini AI Formatting	Google Gemini formats the brief from structured OPB data. Produces Telegram HTML with sections, bullets, and attention items.	System —
Deterministic Fallback	If Gemini is unavailable, a PHP-built fallback brief is delivered instead. No brief is ever silently skipped.	System —
Custom Prompt Override	Super admins can override the Gemini prompt per brief type from the SAL dashboard. Custom prompt stored in WordPress options.	Super Admin POST /sal/config
Preview Mode (Pipeline Inspector)	Generate a brief preview without sending. Inspect the snapshot JSON, prompt, Gemini output, and final Telegram message at each pipeline step.	Super Admin POST /sal/generate
Brief History	Searchable log of all delivered briefs: type, trigger (scheduled/manual), Telegram status, timing, fallback indicator, and full message text.	Super Admin GET /sal/history
SAL Diagnostics	Per-brief-type diagnostics: last run, last success, last failure with error message, next scheduled run. Cron active indicator.	Super Admin GET /sal/diagnostics
Schedule Configuration	Enable/disable each brief type independently. Set custom delivery time (24h HH:MM). Separate SAL Telegram chat ID supported.	Super Admin POST /sal/config

Feature	Description	Roles / Endpoint
Email OTP Authentication	Clients access the portal via a one-time password sent to their registered email. No WordPress account required.	Client (public) POST /client/auth/request-otp, /verify-otp
My Pets Overview	Client-facing view of all their pets' current and upcoming boarding status.	Client (authenticated) GET /client/me
Booking History (Client View)	Client can view their own booking history with stay details and status.	Client (authenticated) GET /client/me
Invoice Access (Client View)	Client can view their invoices and download PDFs from the portal.	Client (authenticated) GET /client/me
Session Management	Sessions stored in opb_client_sessions with expiry. Access log maintained in opb_client_access_log.	System POST /client/auth/logout

Feature	Description	Roles / Endpoint
Branch Management	Create and manage branches: name, code, location, phone, email, active status. Branches scope all operational data.	Super Admin GET/POST/PUT /branches
Staff Management	Create WordPress users with OPB roles, assign to branches. Role determines module access and data scope.	Super Admin WordPress Users API + OPB_User_Admin
Boarding Service Catalogue	Define boarding service types with name, description, pricing (per night / flat), and size applicability.	Super Admin GET/POST /settings/boarding
Add-on Service Catalogue	Define add-on services (grooming, medication admin, special meals) with pricing.	Super Admin GET/POST /settings/addons
Kennel Configuration	Configure kennels per branch: code, name, size, status. Assign staff to kennels.	Super Admin GET/POST/PUT/DELETE /kennels
Business Customization Centre	Central settings hub: facility name, support contact, legal T&C, privacy policy, messaging templates (email, WhatsApp), OPSMAIL credentials, SAL configuration.	Super Admin GET/POST /customizations
Expense Category Management	Define expense categories used across all branches for consistent expense tagging.	Super Admin GET/POST/PUT/DELETE /expense-categories
Role-Based Access Control	Four custom roles: Super Admin (global), Branch Manager (branch-scoped), Reception (operational), Staff (tasks only). Enforced at every REST endpoint.	Super Admin (management) All endpoints
Messaging Template Customization	All automated messages (onboarding, invoice, acknowledgement) are fully editable in the customization centre. Support for {{PLACEHOLDER}} variables.	Super Admin POST /customizations
Login Branding	Custom facility name and logo displayed on the WordPress admin login page.	System / Super Admin (config) —

Feature	Description	Roles / Endpoint
Archive / Restore Clients	Super-admin-only bulk archive and selective restore of client records.	Super Admin POST /admin/clients/:id/archive, /restore
Archive / Restore Pets	Archive individual pet records. Archived pets excluded from booking selection.	Super Admin POST /admin/pets/:id/archive, /restore
Archive / Restore Bookings	Cancel and archive bookings. Full booking history preserved for reporting.	Super Admin POST /admin/bookings/:id/cancel, /restore
Archive / Restore Inquiries	Archive resolved or spam inquiries. Restorable at any time.	Super Admin POST /admin/inquiries/:id/archive, /restore
DATA IMPORT		
Feature	Description	Roles / Endpoint
CSV / XLSX Bulk Import	Import clients, pets, and historical booking data from legacy CSV or XLSX files.	Super Admin POST /import/run
Dry-Run Mode	Validate the import file and report errors/warnings without writing to the database.	Super Admin POST /import/dry-run
Import History	Log of all past imports with record counts, errors, and timestamps.	Super Admin GET /import/history

Feature	Description	Roles / Endpoint
REST API (opb/v1)	Full REST API with 104 route registrations across 21 resource types. All endpoints use WP nonce authentication.	All (role-scoped) All opb/v1/* endpoints
WordPress Plugin Architecture	Standard WP plugin structure. Hooks into WP admin, REST API, cron, and user management. Zero WooCommerce dependency.	N/A N/A
React 18 SPA Frontend	Single-page React application served in the WordPress admin. Client-side routing, React Router v6, no full-page reloads.	All staff N/A
WP Cron Jobs (3)	opb_cron_process_mailbox (5 min), opb_cron_process_telegram (1 min), opb_sal_cron (scheduled per brief). All hooks registered via OPB_Loader.	System N/A
mPDF PDF Engine	mPDF library installed via Composer generates print-quality PDF invoices. Images embedded as base64 for shared hosting compatibility.	System POST /invoices/:id/document/generate
Google Gemini AI Integration	Gemini API used in OPSMAIL (email classification) and SAL (brief formatting). Model and API key configurable. Falls back gracefully on failure.	System / Super Admin (config) —
Telegram Bot Integration	Telegram Bot API used for OPSMAIL notifications and SAL executive briefings. Separate chat IDs configurable per channel.	System / Super Admin (config) —
