1. System Overview & Login

OPB Core is a WordPress-based management system for pet boarding operations. It runs inside the WordPress admin panel and provides a full suite of tools for managing clients, pets, bookings, invoices, tasks, expenses, and operational intelligence.

Accessing the System

- 1 Open your web browser and navigate to your facility's WordPress admin URL (e.g. <https://yourdomain.com/wp-admin>).
- 2 Enter your WordPress username and password. Your administrator will have provided these credentials.
- 3 After login, click "OPB Core" in the WordPress left sidebar to open the management console.
- 4 The system loads the Operations Dashboard as your starting screen.

 OPB Management Console

[WordPress Admin Login Screen]

Custom facility branding appears on the login page

NOTE

Your account must have an OPB role assigned (Super Admin, Branch Manager, Reception, or Staff). Contact your system administrator if you cannot access OPB Core after logging in.

User Roles at a Glance

Role

Super Admin	All modules including SAL, OPSMAIL, Data Mgmt	<i>All branches</i>
Branch Manager	Bookings, clients, pets, invoices, tasks, expenses, reports	<i>Own branch only</i>
Reception	Bookings, clients, pets, invoices, check-in/out	<i>Own branch only</i>
Staff	Tasks only (view and update)	<i>Own branch only</i>

2. Dashboard

The Dashboard is the first screen after login. It shows a real-time summary of your facility's current operational state. Branch Managers and below see only their own branch; Super Admins see all branches aggregated.

Dashboard Cards (Demonstration Data)

OPB Management Console

[Operations Dashboard – Live KPI Cards]

Cards update on each page load from live database data

The demonstration below shows a typical dashboard state for a facility with three branches:

23 Active Boarders	4 Arrivals Today	3 Departures Today
7 Open Tasks	2 Overdue Invoices	¹12,400 Payments Today

NOTE

The dashboard does not auto-refresh. Reload the page to get the latest figures.

3. Inquiries & Client Onboarding

New clients begin their journey as an Inquiry. The inquiry is submitted via the public-facing form on your website, or can be created manually by reception staff. The inquiry workflow progresses through assessment, onboarding, and conversion to a full client record.

Inquiry Workflow Overview

Processing an Inquiry

- 1 Navigate to Inquiries in the sidebar. New inquiries are highlighted in blue.
- 2 Click an inquiry to open the detail view. Review the owner name, phone, email, preferred dates, and pet details.
- 3 Run the duplicate check to verify the client is not already in the system.
- 4 Add internal notes as needed (e.g. "Called and confirmed — medium dog, no known conditions").
- 5 Click "Send Onboarding Link" to generate a unique onboarding URL and send it via WhatsApp or email.
- 6 Once the client completes the online form, the status changes to "Onboarding Complete".
- 7 Click "Convert to Client" to create the full client and pet records. The inquiry is linked to the new client.

TIP

Use the WhatsApp button to send the onboarding link. Pre-filled messages use the template from Settings > Customization.

Online Onboarding Form (Client-Facing)

The client receives a link to a multi-step form on your website. They complete this without creating a WordPress account:

- 1 Personal details: name, phone, email, address.
- 2 Pet details: name, type, breed, size, DOB, vaccination status, medical history.
- 3 Document uploads: vaccination certificates, vet records (optional).
- 4 Terms & conditions acceptance (version-tracked).

NOTE

The onboarding link expires after 30 days. Use "Resend Onboarding" on the inquiry detail to generate a fresh link.

4. Client Management

Finding a Client

- 1 Click "Clients" in the sidebar to open the client list.
- 2 Use the search box to find a client by name, phone number, or email address.
- 3 Click the client name to open their full profile.

Client Profile Sections

- Contact Details — name, phone, email, home branch, referral source.
- Wallet Balance — current credit balance. Deducted automatically when recording payments.
- Pets — all linked pet profiles with quick-view links.
- Booking History — all past and active bookings, filterable by status.
- Invoice History — all invoices with status and outstanding amounts.
- Portal — generate or view the client's My Pets self-service portal link.

Creating or Editing a Client

- 1 Click "New Client" (from the client list) or "Edit" on the client profile.
- 2 Fill in the required fields: Full Name, Phone Number, Home Branch.
- 3 Add email, address, and referral source if available.
- 4 Click Save. The client record is created immediately.

Sending a WhatsApp Message

- 1 Open the client profile.
- 2 Click the WhatsApp button next to the client's phone number.
- 3 WhatsApp opens on your device with a pre-filled message. Edit if needed and send.

TIP

The WhatsApp message template is customisable in Settings > Customization > Messaging Templates.

5. Pet Management

Viewing a Pet Profile

From the client profile, click any pet name to open the pet profile. You can also search for pets by name using the global search.

OPB Management Console

[Pet Profile – Medical Details and Document Uploads]

Demonstration: Bruno – Labrador, Male, 3 years, Fully Vaccinated

Pet Profile Fields

Field		
Name	Pet's name	Bruno
Pet Type	Dog, Cat, Bird, etc.	Dog
Breed	Breed name	Labrador Retriever
Breed Size	Small / Medium / Large / Giant	Large
Date of Birth	Pet's DOB	12 March 2023
Microchip Number	ISO microchip ID if any	900215000123456
Vaccination Status	Vaccinated / Partial / Unvaccinated	Vaccinated
Ongoing Medication	Current medications and dosage	Apoquel 16mg – once daily with food
Dietary Restrictions	Food allergies or dietary needs	Grain-free diet only
Major Illness History	Past significant health events	Hip dysplasia diagnosis – June 2025
Grooming Preferences	Preferred grooming style or instructions	No blow-drying — air dry only
Special Care	Flag for attention in SAL brief	Yes – requires morning medication

Uploading Pet Documents

- 1 Open the pet profile and scroll to the Documents section.
- 2 Click "Upload Document" and select the file (PDF, JPG, PNG).
- 3 The document is stored and displayed with the upload date.

NOTE

Accepted file types: PDF, JPG, PNG, WEBP. Maximum file size is determined by your server's PHP upload limit (typically 10–32MB).

6. Creating a Booking

A booking records a planned boarding stay for one or more pets. The system generates an invoice automatically on booking creation.

Step-by-Step: New Booking

- 1 Click "Bookings" in the sidebar, then click the "New Booking" button.
- 2 Select the client from the dropdown (type to search by name or phone).
- 3 Select the branch for this booking.
- 4 Add pets: click "Add Pet" and select each pet from the client's pet list. You can book multiple pets in one booking.
- 5 For each pet, set the check-in date, check-out date, and boarding service type.
- 6 Optionally add add-on services to each pet's stay (grooming, medication admin, special meals).
- 7 Review the pricing summary. The total is calculated by the pricing engine.
- 8 Click "Create Booking". The booking and invoice are created simultaneously.

   OPB Management Console

[New Booking Form – Multi-Pet with Add-ons]

Demonstration: Priya Nair – Bruno (Premium Suite, 7 nights) + Medication Admin + Grooming

Pricing Breakdown (Demonstration)

Boarding Service	Pet	Nights	Rate/Night	Subtotal
Premium Suite	Bruno	7	¹1,000	¹7,000
Daily Medication Admin	Bruno	7	¹100	¹700
Full Grooming Session	Bruno	1 (flat)	¹700	¹700
TOTAL				¹8,400

NOTE

Add-on services can be added or removed after booking creation from the Booking Detail screen.

7. Check-In & Check-Out

Check-In Workflow

Perform check-in when the client arrives with their pet. This records the actual arrival and assigns a kennel.

- 1 Open the booking from the Booking list or from the client profile.
- 2 Click the "Check In" button.
- 3 Verify the pet details, vaccination status, and any medication or special care notes.
- 4 Select an available kennel from the dropdown (filtered by pet size).
- 5 Confirm the actual check-in date and time.
- 6 Click "Confirm Check-In". The kennel is marked occupied and an OPSMAIL notification is queued.

NOTE

If a pet has unvaccinated status, a red warning banner appears on the check-in screen. Check-in can still proceed but is logged.

Check-Out Workflow

- 1 Open the booking and click "Check Out".
- 2 Verify the actual departure date. If the pet stayed longer than booked, the system flags the extension.
- 3 If stay was extended, the pricing engine recalculates the invoice and adds a line item for the extra nights.
- 4 Click "Confirm Check-Out". The kennel is released and the booking is marked complete.
- 5 The invoice is ready for payment recording or sending to the client.

TIP

After check-out, use the WhatsApp invoice link on the invoice detail screen to send the final bill to the client instantly.

8. Kennel Management

Occupancy Board

The Kennel Occupancy Board gives a live view of every kennel in the branch. Access it via Kennel > Board in the sidebar.

Each kennel card shows: kennel code and name, current occupant (pet name + owner), stay dates, and status indicator.

Kennel Status Colours

Green	Vacant — kennel is available for booking
Blue	Occupied — pet is currently boarded
Amber	Cleaning / Maintenance — temporarily unavailable

Linear Timeline View

The linear timeline shows kennel occupancy across a date range. Useful for capacity planning and identifying gaps.

- 1 Click "Kennel" > "Timeline" in the sidebar.
- 2 Select a date range (default: current week + 2 weeks ahead).
- 3 Each row is a kennel. Filled segments show occupied periods with pet names.

9. Invoicing & Payments

Invoice Overview

Invoices are created automatically when a booking is made. They contain itemised line items for each boarding stay and all add-on services.

#	Description	Amount
1	Premium Suite – Bruno (7 nights)	₹7,000
2	Daily Medication Admin – Bruno	₹700
3	Grooming Session (Full)	₹700
TOTAL		₹8,400

Paid: ₹5,000

Outstanding: ₹3,400

Recording a Payment

- 1 Open the invoice from the Invoice list or the booking detail.
- 2 Click "Record Payment".
- 3 Enter the amount received, select the payment mode (Cash / Card / UPI / Bank Transfer / Wallet), and add a transaction reference if available.
- 4 Click Save. The invoice status updates automatically (partial != paid).

NOTE

Multiple partial payments can be recorded against the same invoice. The audit trail logs every payment with timestamp and staff member.

Sending the Invoice to the Client

Three delivery options are available from the Invoice Detail screen:

- 1 Email PDF: Click "Send by Email" to email the PDF invoice as an attachment to the client's registered email address.
- 2 WhatsApp Link: Click "WhatsApp" to open a pre-filled WhatsApp message with the invoice summary and payment details.
- 3 Public URL: Click "Copy Public Link" to get the token-gated invoice page URL. Share this link — the client can view and download without logging in.

Invoice Adjustments

- 1 Open the invoice and click "Adjust Invoice".
- 2 Enter the adjustment amount (negative for a discount, positive for additional charges).
- 3 Enter the reason for the adjustment (required). Click Save.
- 4 The adjustment is added as a line item and logged in the audit trail.

10. Task Management

Tasks are used to track operational responsibilities: kennel cleaning schedules, veterinary appointments, equipment maintenance, and ad-hoc duties. All staff can view tasks; Reception and above can create them.

Creating a Task

- 1 Click "Tasks" in the sidebar.
- 2 Click "New Task".
- 3 Fill in: Title (required), Description, Branch, Assignee, Priority (Low / Medium / High / Urgent), Due Date.
- 4 Click Save. The task appears in the task list and is visible to the assignee.

Updating Task Status

- 1 Find the task in the task list (filter by assignee or status if needed).
- 2 Click the status dropdown on the task card.
- 3 Select: Open !' In Progress !' Done.

NOTE

Overdue tasks (past due date, not done) are highlighted in red in the task list and appear in SAL Morning and Evening Briefs.

Demonstration — Current Task Board

● ● ● OPB Management Console

[Task List – Current Board with Priority and Status Filters]

Demonstration: 7 open tasks including 2 overdue (Kennel L-03 Deep Clean, Vet Appointment – Rocky)

11. Expense Tracking

Recording an Expense

- 1 Click "Expenses" in the sidebar.
- 2 Click "Add Expense".
- 3 Enter: Description, Amount, Category, Branch, Date.
- 4 Click Save. The expense is recorded and included in today's SAL Accounts Snapshot.

Demonstration — Daily Expense Log

OPB Management Console

[Expense Log – Today's Entries by Branch]

Demonstration: ₹14,200 in expenses across 3 categories

Category	Description	Branch	Amount
Feed & Supplies	Royal Canin dog food — 25kg bag × 3	Kozhikode Main	₹12,400
Veterinary	Dr. Anil consultation – Rocky (Arjun Menon)	Calicut City	₹1800
Utilities	Electricity bill – July advance	Kozhikode Main	₹11,000

TIP

Expenses can also be submitted by emailing your configured OPSMAIL inbox. Gemini AI reads and classifies the email and creates the expense record automatically.

12. Reports & Analytics

The Reports module provides date-range filtered views of revenue, occupancy, expenses, and payment modes. Access via "Reports" in the sidebar. Required role: Branch Manager or Super Admin.

Available Report Views

Revenue Summary

Total billed, paid, and outstanding amounts by branch and month.

Occupancy Analytics

Occupancy rate over time. Average stay length. Peak occupancy days.

Boarding Trends

Bookings by pet type, breed size, and boarding service category.

Expense Analysis

Total expenses by category and branch. Income vs expense comparison.

Payment Modes

Breakdown of payments by mode: cash, card, UPI, bank transfer, wallet.

Using Reports

- 1 Select the date range using the From and To date pickers at the top of the Reports screen.
- 2 Select a branch (Super Admin only — Branch Managers see their branch automatically).
- 3 The report updates automatically. All figures reflect the selected period.

OPB Management Console

[Reports Screen – Revenue and Occupancy Charts]

Demonstration: June 2026 – ₹1,24,000 revenue, 82% average occupancy across 3 branches

13. OPSMAIL Setup & Management

OPSMAIL is the operational messaging pipeline. It sends event notifications to Telegram and processes incoming operational emails via AI. OPSMAIL is configured in Settings > Customization. Access to the OPSMAIL queue requires Super Admin.

Required Configuration

- Telegram Bot Token — create a bot via @BotFather on Telegram. Copy the token.
- Telegram Chat ID — the target channel or group chat ID where notifications are delivered.
- Gemini API Key — required for email classification. Free tier sufficient for most facilities.
- IMAP Host, Port, Username, Password — your facility's email inbox for OPSMAIL to monitor (optional).

Setting Up Telegram Notifications

- 1 Go to Settings > Customization > OPSMAIL section.
- 2 Enter your Telegram Bot Token and Chat ID.
- 3 Click Save, then navigate to Admin > OPSMAIL and click "Test Telegram" to verify delivery.
- 4 Once verified, all operational events (bookings, check-ins, payments) will deliver notifications to your Telegram channel.

OPSMAIL Queue Viewer

The queue viewer at Admin > OPSMAIL shows all pending and delivered events. Each item shows the event type, message content, delivery status, and timestamp. Click "Acknowledge" to mark processed items.

14. SAL Executive Briefings

SAL (Situational Awareness Layer) automatically generates and delivers operational briefs to Telegram. Set up at Admin > SAL. Required role: Super Admin.

Configuration Steps

- 1 Navigate to Admin > SAL in the sidebar.
- 2 In Section A (Schedule Configuration), enable each brief type and set the delivery time.
- 3 In Section B (Telegram), enter the SAL Chat ID (or leave blank to use the main OPSMAIL Chat ID).
- 4 Click "Save Configuration".
- 5 Click "Send Test Brief" to verify Telegram connectivity and see a sample brief.

Preview Mode

Before relying on SAL in production, use Preview Mode to inspect the full pipeline:

- 1 Select the brief type (Morning / Evening / Accounts) from the dropdown in Section: Preview Mode.
- 2 Click "Generate Preview". The system queries live OPB data but does NOT send to Telegram.
- 3 Review each tab: Snapshot JSON (raw data), Prompt (sent to Gemini), Gemini Output, Telegram Message.

TIP

Use the "Prompt" tab to verify your custom prompt is being applied correctly before making it live.

Customising the Gemini Prompt

- 1 In Section E (Prompt Customization), click the tab for the brief type you want to customise.
- 2 Enter your custom instructions in the textarea. Use {brief_label} and {date} as placeholders.
- 3 Click "View default" to see the built-in prompt for reference.
- 4 Click "Save Prompts". The custom prompt is used for the next brief delivery.
- 5 To revert: click "Reset to default" and confirm. The built-in prompt is restored immediately.

NOTE

The operational data block (live OPB facts) is always appended automatically — you cannot accidentally remove it from the prompt.

Example — Morning Brief Output

[SAL Morning Brief – Example Telegram Delivery]

Demonstration: 20 June 2026, 07:00 – 3 branches, 23 boarders, 2 overstays, 1 unvaccinated pet

Ø=Ü> OPB Morning Operations Brief
20 June 2026

SUMMARY

Onukonu Pet Boarding is operating at 82% capacity across all three branches with 23 pets currently boarded. Two overstays and one unvaccinated pet require immediate attention.

ATTENTION REQUIRED

- Overstay: Bruno (Priya Nair, KZK Main) – checkout was 18 June
- Overstay: Max (Rajan Pillai, Calicut City) – checkout was 19 June
- Unvaccinated: Shadow (Lakshmi Iyer) – currently boarded at KZK Main

BOARDING

Kozhikode Main: 12/16 kennels active · 2 in · 1 out today

Calicut City: 7/10 kennels active · 1 in · 2 out today

...

15. Settings & Configuration

All system settings are accessed via the Settings section in the sidebar. Most settings require Super Admin access.

Settings Sections

Branches

Create and manage facility branches. Each branch has a name, code, location, contact details, and active status.

Staff

Create WordPress user accounts with OPB roles. Assign each user to a branch. Roles determine module access.

Boarding Services

Define the boarding service types available at your facility (e.g. Standard Suite, Premium Suite). Set per-night pricing.

Add-on Services

Define add-on services (grooming, medication admin, special meals) with pricing.

Kennels

Configure individual kennels per branch: code, name, size category, and active status.

Customization

Central settings hub: facility name, contact details, messaging templates (email and WhatsApp), legal T&C, privacy policy, OPSMAIL credentials, SAL prompt overrides.

Expense Categories

Manage expense categories (Feed, Veterinary, Utilities, etc.) used across all branches.

● ● ● OPB Management Console

[Settings > Customization – Messaging Templates and OPSMAIL Configuration]

Super Admin view: all 30+ customizable settings organized by category

TIP

All messaging templates support {{CLIENT_NAME}}, {{FACILITY_NAME}}, {{BOOKING_ID}}, and other placeholders. Refer to the template help text for the full list of supported variables.
